Scaling and cost exposure

AWS Academy is the main lesson. This short deck connects it to our class work.

PRIMARY

AWS Academy

Cloud Foundations · Module 10

IN CLASS

Practice

Lab 6 · Load Balancing / Auto Scaling

COURSE WORK

Local task

Local 05 starts · C5R1 Part 1 / C5R2 Part 2

Local 05 due 11 Jan · Use only your assigned Part

One path through the topic

STEP 1

Traffic

A public endpoint accepts requests that drive application work.

STEP 2

Scale

Unrestricted expensive requests can keep adding capacity up to the configured limit.

STEP 3

Control

Limit abusive demand, then verify ordinary requests still succeed.

What evidence shows the fix limits load without breaking legitimate use?

What to do this week

BEFORE CLASS

Prepare

Open Module 10 and the scaling lab.

IN CLASS

Work

Run the AWS lab, then compare local load and cost outcomes.

AFTER CLASS

Record

Begin your assigned Local 05 Part; keep request and response evidence.

AWS work stays in AWS Academy · Local work stays in Classroom

Scaling and the local abuse case

TRAFFIC PATH

LB → target group → ASG

The load balancer routes to healthy targets; the Auto Scaling Group adds or removes instances within its limits.

COST BOUND

Minimum and maximum

Minimum preserves baseline capacity; maximum limits scale and cost, but a high maximum still permits costly abuse.

TWO CONTROLS

Key + rate limit

An API key identifies an allowed caller; a rate limit bounds calls even if a valid key is leaked.

Local 05: check that normal requests still succeed after both controls are applied.
