Effective permissions

AWS Academy is the main lesson. This short deck connects it to our class work.

PRIMARY

AWS Academy

Cloud Security Foundations · Module 3

IN CLASS

Practice

Lab 3.1 · S3 resource policies (60 min)

COURSE WORK

Local task

Local 06 · C5R1 Part 2 / C5R2 Part 1

Local 06 due 25 Jan · Use only your assigned Part

One path through the topic

STEP 1

Identity

The user or role policy grants actions to the requesting identity.

STEP 2

Role

Trust and assumption determine which role session can make the next request.

STEP 3

Resource

A bucket policy can grant resource access; an applicable explicit Deny wins.

Can a bucket policy change the result of an implicit identity-policy deny?

What to do this week

BEFORE CLASS

Prepare

Open Module 3 and the Week 02 lab-entry guide.

IN CLASS

Work

Complete Lab 3.1 and trace the user-to-role-to-bucket path.

AFTER CLASS

Record

Submit your assigned Local 06 Part with the final permission evidence.

AWS work stays in AWS Academy · Local work stays in Classroom

Who a bucket policy can admit

WILDCARD

Principal: *

The policy names every principal, including anonymous callers, before any conditions are evaluated.

TAG CONDITION

A narrower match

A PrincipalTag condition excludes anonymous callers without that tag, but does not name one intended role.

SCOPE

Name the role

Use the intended role as Principal and check its assumption and resource permissions.

Local 06: a tag condition is not the same as scoping access to BucketsAccessRole.
